## 【NOTE】

- Bluetooth or wireless earphones are NOT RECOMMENDED.
- The sound may be breaking up if Wi-Fi or your carrier network is not strong enough.
- Please use the latest version of the app.

● We recommend downloading the application. If you can't download it, you can access from the browser. When using the browser, please use Google Chrome or Safari not Internet Explorer.

● In addition to the computer used for the Web meeting, please also have another device for listening to the interpreter's voice.

● From the application "interprefy", you can only hear the interpreter's voice, please listen to the web meeting' voice from the PC which you use for the web meeting.

PC for Web meeting

You can listen to meeting voice.

Please speak to **Web meeting** when you want to speak.

&

Another device  
for interprefy

You can listen to the interpreter's voice only.

**Do NOT speak to interprefy** when you want to speak.

● Please use an earphone when using this application so that video conferencing software won't catch the interpreter's voice.

● Please make sure your microphone is always on mute, and unmute only when you want to speak.
